Release Notes & Updates

February 14, 2022

These are the new features and updates for our (22.3) release.
If you have any questions about the items listed in this release, please visit **The Exchange** and leave a comment.

LMS (Trident)

PRODUCT

- In the sharing marketplace you can now click the update share button to retrigger the share to re-share any quizzes or other resources related to the shared in program.
- Added Event Time ID to the column chooser on the Products page.
- Complex Live Events: if you're using the setting that automatically sets your completion date as the event date (see Manager settings: Live type events completed on the date of the event), and you are using agenda items in a complex live event to issue credit, now the completion date in the credit tracker will represent specifically the date of the event.
- Classrooms and Virtual Events: Just like the "Launch" button that you can use to code the program onto the HTML page, you can now also use the new {Handout} and {Certificate} button to fully customize your programs!
- This would allow clients to set a start and end date on payment plan availability on a product. If you are offering this for a live event, this would allow admins how flexible payment plans were in respect to the event.
- Complex Live Events: A couple of updates to clean up the way that you can mark users complete at the agenda level. Moving the verify attendance tool to the left and removing attendance tools that are confusing.

REPORTS

- Added some contextual information to define the reports that are found in the Reports List.

IMPORTS

- Add notes showing the required fields on the order import template.

LISTS

- Certificates: Broke up the message tokens to be a bit easier to find which credit message token you need.

AMS (Lighthouse)

GROUPS

- **Failed CC Payment Update: For recurring group dues, donations, and payment plans we would retry the card every day for a set period of time. Now we will only retry the card once and this will take place 5 days after the original attempt.**
- Increased the test amount for groups that require approval and do not charge dues until approved.
- Changes and updates made to Product Groups.

REPORTS

- Updated the logic in the date type field when scheduling the Group Members report so that all active members can be pulled.

SETTINGS

- Changed to drag and drop tool for order.

Full System

PRODUCTS

- Auto-clearing cache when publishing/unpublishing products allow the changes to appear instantly in the catalog!
- User Forum Settings now appear as expected in programs.

LISTS

- Evaluation Key now defaulted High to Low in pre-existing and future Evaluations.

MANAGER

- New Message Tokens added to Credit Tracker Transcript template. Now you can add any Customer Custom Fields.

REPORTS

- Added a way to favorite your most used reports so that they are at the top of your list of reports rather than having to hunt for them each time!
