

Release Notes & Updates

April 11, 2022

These are the new features and updates for our (22.7) release.

If you have any questions about the items listed in this release, please visit [The Exchange](#) and leave a comment.

LMS (Trident)

PRODUCTS

- For Classrooms and Virtual Summits: When they're accessing their certificate from their account page and reviewing all their completion results in the certificate button there, we are now showing the Title and Date so that your registrants remember which program they're completing.
- Classrooms/Virtual Events + Credit Tracker: If you use our credit tracker feature, we have a new option which will allow you show/hide the overall Classroom/Virtual Event Credit so that you can prevent duplicate credit showing there. Until this fix, if you had credit on the Classroom/Virtual Event AND in the individual modules, the credit tracker would show each separately. You can find this setting in the Overall Event, where you add in the credits.

REPORTS

- Adding the pending orders checkbox option to the Product Sales Summary Report. This is the same option as we have for the Product Sales Report.
- New Column in the Completion and Registration Reports: Is Speaker. This will tell you with True or False, if the person on this report is the speaker of that program or just a regular registrant.

AMS (Lighthouse)

ACCOUNTS

- Added a membership tab to the company profile in Manager for easier company membership management.

MANAGER

- Added a button in the Manager header to access the WordPress Admin quicker.

REPORTS

- Standard and Custom fields are now added to the Column Chooser in Company Reports.

SALES

- Added donation information to the invoice templates.

Full System

PRODUCTS

- If a program with Purchase CE is associated with a bundle, an additional Module will now pop up before adding the bundle to cart.

REPORTS

- New Column: Last Purchase Date added to Product Sales Summary Report that displays the latest date in which the program was purchased.
