NAVIGATING **EDUCATIONAL EVENTS** TOGETHER

With over 42M hours of streaming content on our platform, CE21 has the extensive expertise to understand what makes a successful event. We can help you design the right meeting environment for your organization. CE21 can help you record and stream live in-person events, host events incorporating in-person and virtual components, and host entirely virtual conferences with robust accreditation features. If circumstances change, we can help you pivot to another CE21 service.

Virtual Conferences

Utilizing CE21's powerful features, you can create dynamic live or simulated-live programs that make it possible to connect people across the world, all while extending the life of face-to-face events and virtual conferences beyond the live dates by repurposing content into on-demand access to video replays.

In-Person Videography

As part of the live event services CE21 can provide to our LMS customers, CE21 offers a nationwide videography network that can provide live webcasting and/or recordings that can be a better experience for an attendee than being there in person.

Hybrid Events

CE21 bridges the divide between in-person and virtual conferences by facilitating impactful Hybrid events that bring together the best of both and enable associations to be flexible and adaptable therefore reaching more members while increasing non-dues revenue and reducing overhead costs.

CE21 also offers:

One Login for both Staff and Members

Streamline and simplify the experience with our cloud-based platform that allows automated recurring dues payments and donations while integrating with your website through WordPress.

Certification and credit tracking

Create, market, and deliver your fully customized CE programs with our various certification tools and automatic certificate distribution, which are accompanied by robust reporting and customer service tools.
