

**CE21**  
**TRIDENT LMS**  
 ONLINE LEARNING FOR A CHANGING WORLD

Constructed as a complete, cloud-based CE registration, delivery, and automated certification system, the CE21 Trident Learning Management System (LMS) encourages members of organizations to expand their knowledge and stay current on the newest developments, regulations, and standards in the way they desire (or demand!). Built within Microsoft Azure cloud services, the system's versatility and customizability provide the bandwidth and computing power our customers require.

### **CE21 Classroom**

Prescribed modular learning that integrates various media types, such as live webcasts, on-demand seminars, and webinars, to create a dynamic and comprehensive educational experience.

### **CE21 Sharing Marketplace**

Provides the opportunity to share your programs with fellow CE21 partners, enabling you to generate extra revenue beyond membership fees. Moreover, it allows you to expand your catalog by sharing and incorporating program content from other associations, thereby increasing your sales potential.

### **Reporting**

Easily mine and extrapolate your data in customizable reports, graphs, and statistics related to sales, program completion data, shopping trends, and more.

### **Certification and credit tracking**

Customize your CE programs with our various attendance tracking tools, complex quizzing features, and automatic certificate distribution, which are accompanied with robust reporting and analytics.

---

### **CE21 also offers:**

---

#### **One Login for both Staff and Members**

Streamline and simplify the experience with our cloud-based platform that allows automated recurring dues payments and donations while integrating with your website through WordPress.

#### **Bridging Live + Virtual Events**

CE21 can help you record and stream your in-person events, host events that incorporate in-person and virtual components, and host a fully virtual conference, all with robust accreditation features.
